## **Abstract**

The modern society expects that the university students will have the skills to work in a team, professional competences, and ability to think critically about the surrounding. The subject of studying the processes of critical thinking education, finding a way out of difficult situations and applying such skills in practice, is relevant and attracts the attention of domestic and foreign researchers. According to their view, the higher education institution students should have the integrative skills, ability to work in a team, think critically and creatively realize their ideas. Formation of critical thinking is the result of interaction between a teacher and a student, and is most fully manifested in the involvement of students in teamwork, where the process of active thinking is created through the special training, making exercises and carrying out trainings.
